

Are you the full-time and ambitious **Microsoft Business Intelligence Specialist** VisionWaves is looking for to bring our software to the next level?

VisionWaves has developed software called VisionWaves to support her methodology. The VisionWaves software has been designed with the business manager in mind. Everything from user interface to collaboration was developed aiming at the same goal: provide the optimal and integrated workspace for the manager. From strategic management meetings to daily operational management, VisionWaves offers integrated information and active management tools for every business function or role.

Within VisionWaves the Expert Center is a growing group of business and technical consultants responsible for support both the VisionWaves practices and our wide range of partners in building customer competence centers. For the Expert Center in Zeist we're looking for a full-time and ambitious Microsoft Business Intelligence Specialist.

### Your job responsibilities

You will be responsible for supporting customer facing projects in building and maintaining the integration with customer's source systems. Besides these activities we expect every member of our Expert Center to participate in the development of our tool by providing business driven requirements to our development team, to ensure our tool matches the actual business requirements with our customers.

### We're looking for someone:

- Who is tired of the "Old" traditional way of doing Business Intelligence;
- With knowledge of and experience with Microsoft SQL Server Integration Services;
- Preferable with knowledge of and experience with Microsoft SQL Server Analysis services and Reporting Services;
- Who is looking for the opportunity to contribute towards VisionWaves' unique Business Intelligence vision;
- Who is eager to learn, driven, and possesses an enthusiastic mindset;
- Who is an abstract and conceptual thinker (at least HBO).

### We offer:

- A good reward depending on knowledge and experience;
- A challenging and variable environment;
- A qualitatively high-marking challenge.

### Getting to know VisionWaves

You will start your VisionWaves introduction program at our corporate headquarters in Zeist. The Expert Center will introduce you to VisionWaves, our products, way of working and your new colleagues.

### Interested in joining our team?

At VisionWaves we're committed team players with a passion for what we do. If you think you have what it takes to join our team and your profile fits our requirements, please send your résumé and motivation letter by e-mail [jobs@visionwaves.com](mailto:jobs@visionwaves.com).

### Application process at VisionWaves

After we have received your application, it will be reviewed to see if you fit the profile of the vacancy. If you fit the ideal profile, you will be invited to an interview with our colleagues in the field. There will be an average of 2 to 3 interviews, which can also be planned at the end of the day.

### About VisionWaves

VisionWaves was founded in 2000 and develops unique software to support and improve management of organizations. Every manager and employee obtains an individual Management Portal where overview and insight offered in the functioning of the organization, from strategy to operations. The software can be fully integrated with existing IT environments, such as Business Intelligence (BI), Business Process Management (BPM), Corporate Performance Management (CPM) and Governance, Risk & Compliance (GRC) tools. VisionWaves provides solutions for organizations in healthcare, aerospace and defense, banking, insurers and governments, both in the Netherlands and internationally. VisionWaves works together with reputable partners in Europe, the U.S. and Latin America.

VisionWaves is an innovative and ambitious organization with an open and professional culture. Our core values are client-focus, involved, visionary, result driven and expertise. We currently employ 42 people and we are growing national and international. We have offices in the US, United Kingdom and Chile.
