

INDUSTRY SOLUTION HOSPITALS

“If only I could start every day like this!”

Board of Directors after the presentation of their dashboard

“I was very impressed with this solution. It is not the VisionWaves solution, but the Vision’Shock’Wave solution.

Heart specialist, Dutch hospital

Is your hospital a success?

The healthcare sector is changing from a supply-push to a demand-pull market. How is your organization grasping this opportunity? Quality improvement, improvement of the financial position, efficient healthcare processes and smarter use of human and medical resources. VisionWaves offers an organization-wide solution: ‘Hospital Management Solution’. A Solution that contains all the elements necessary to make your hospital a success. Fast, economical and easily implemented and directly ready for use.

VisionWaves promises within six months:

- 10 % throughput time improvement of the clinical pathways
- 10 % improvement of the OR and MRI occupation
- 7 % increase in patients/clients
- 5% lower costs and higher quality of the care process
- Continuous improvement of your Capital & Reserves
- The ability to pilot your hospital towards a top position

VisionWaves will:

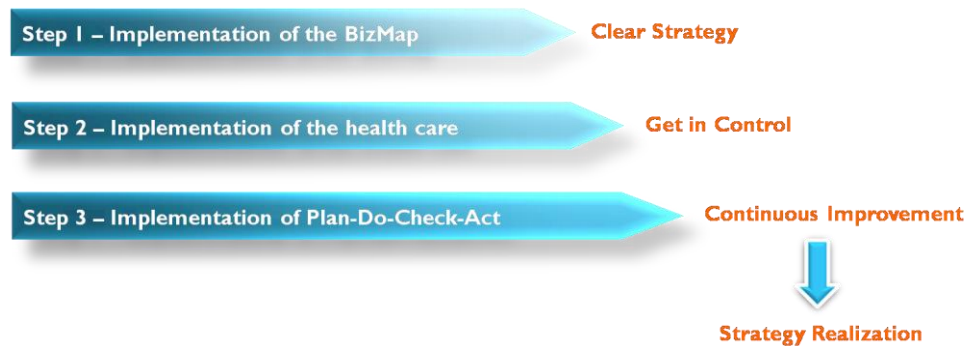

- Deliver a complete establishment of your management reviews for the board and management;
- Solve your organization’s logistic bottlenecks, like the OR and MRI;
- Create faster flow of patients/clients, more treatment/production in the same time, with the same resources;
- Optimize use of your infrastructure, do more with the same square meters;
- Establish a personal portal for all responsible people within the organization;
- Generate more time and resources available for innovation;
- Improve your financial position;
- Improve your market position.

The Hospital Management Solution of VisionWaves

Extensive and intensive experience and good customer relations have allowed VisionWaves to develop the Hospital Management Solution for hospital organizations, using the VisionWaves software, VisionWaves Delta. The Hospital Management Solution is based on the BizMap principle and provides an integrated management platform for all management levels of the organization, with a direct link to processes and an integrated Plan-Do-Check-Act approach. This means that the targets specified on strategic level are translated to specific targets at the operational level. These processes are an integral part of the Hospital Management Solution and

are ready to be implemented and used with minimal organizational adaptations. VisionWaves Delta allows the organization not only approach health care processes from a horizontal direction, but also to make a vertical dissection of the organization to identify and solve important logistic bottlenecks. The connection between our software suite, EHC and ERP health care systems offers hospitals the possibility to work from one portal.

The implementation of the Hospital Management Solution is achieved through the following three steps:

Industry content of the Hospital Management Solution

The integrated Management platform for all management levels contains

- 50 Best practice KPIs
- 70 Best practice care processes (80 % coverage)
- 10 best practice KPIs for each care process
- Benchmark data
- Plan-Do-Check-Act -Cycle implementation
- Management report Board of Directors
- Management report Supervisory Board
- Management report for all 30 medical specialties
- Best practice medical support processes (OR, MRI, etc)
- Best practice Planning & Control processes
- 10 best practice Risks & Controls
- Industry role portals

In short:

VisionWaves, the New Standard for Hospital Management.
